EXPERIENCE

Intern
Softnika Solutions Pvt Ltd
- Work as a Backend Developer
- Handel the database using PHP and SQL
- As my main project there I created a gaming site.
- Comes up with new ideas for the company website

PROJECTS

1. **College Website**
   This was my final year project in which me and my team created the whole website from scratch sing HTML CSS Bootstrap JS and Firebase.The main function of the website was to hold the data of each student with a Unique ID and Authorized person can generate reports of multiple students.
   https://github.com/Devanshu269/AMC-Website.git

2. **Portfolio**
   This is a clean and nice web portfolio whose design I learn from youtube and for the backend and contact part I use Firebase.
   https://github.com/Devanshu269/Portfolio.git

3. **Todo**
   This was a simple todo app that I created while learning JS. For UI I use HTML and CSS.
   https://github.com/Devanshu269/TODO.git

4. **Notes**
   Another ap which I created while learning the JS as the name suggests its a for taking notes with HTML CSS and JS.
   https://github.com/Devanshu269/TODO.git

5. **Calculator in C**
   It was the first app that I created in my first year of college after learning C.
   https://github.com/Devanshu269/Calculator.git
