EXPERIENCE

Intern
Softnika Solutions Pvt Ltd.

📅 May 2020   📍 Bangalore,India

- There I work as a Backend Developer handling database using PHP and SQL.
- As my main project there I created a gaming site.

PROJECTS

Project 1
College Website

- This was my final year project in which me and my team created the whole website from scratch using HTML, CSS, Bootstrap, JS and Firebase.The main function of the website was to hold the data of each student with a Unique ID and Authorized person can view, update, delete or can generate report based on semester section or branch.

Project 2
Portfolio

- This is a clean and nice web portfolio whose design I learn from youtube and for the backend and contact part I use Firebase.

Project 3
Todo

- This was a simple todo app that I created while learning JS. For UI I use HTML and CSS.

Project 4
Notes

- Another app which I created while learning the JS as the name suggests its use for taking notes technologies used to create :- HTML CSS and JS.

Project 5
Calculator in C

- This is a simple calculator which I build while starting the coding journey in my first year of college after learning C.

SKILLS

- Preferred

`C++` `HTML` `CSS` `JS`
`Data Structures` `Algorithm`

- Familiar

`C` `Firebase` `Python`

- Beginner

`SQL` `PHP` `Node.js` `React`
